Requirements from the Report of the Mini-Project.

Each of the items below should be elaborated in a separate section.

1) The paper from which the alg' is taken.
2) The alg' itself.
3) Your implementation of the alg'.
4) The experiments you chose to run.
5) The implementation of those experiments.
6) The results of your experiments, given by some kind of tables or graphs.
7) The conclusions and directions for future work.

Once you are done with the report send me a package containing your report, and your code, and a README describing how to run your code.
